

Azure Projects

1. Face Recognition by using Computer Vision & Python
2. Dockerization of Nginx based application & deploying it with AKS (Azure Kubernetes Service) for scaling up & Down during heavy network traffic
3. Python Developed Gesture Controlled & AI Monitored Mouse by using Computer Vision
4. Build & Deployment of IPV6 associated simulation Environment for Mesh network by making use of Rest Architecture based CoAp on azure platform using Contiki Operating System
5. Java developed application on Waste food management system & Deployment on Azure App Services
6. Online Food Ordering System Using Python & Django App and HTML
7. Electric Vehicle Charging station finder & Slot booking website by using Python
8. Web application of Educational Information in College & Providing communication between Students
9. Ayush - Health care ChatBot using Java & Html
10. Android Mobile Application & Automation Using APPIUM
11. Attendance Tracking System Using CV & Machine Learning, PHP, HTML
12. Building a tomcat deployable java based web application & Integrating it with Azure Devops for Continuous Integration & Continuous Delivery
13. Bug tracking using cyber security
14. E-commerce website with FAQ bot using java
15. A Bi-Objective Hyper-heuristic support vector machine for cyber security in network
16. Blood bank and donation management system using PHP
17. Automated Network Scanning and Sniffing Tool using python and creating a static HTML webpage for UI
18. Detecting data leaks using SQL injection
19. A Tool for automation and enhancement of cybersecurity analytical methods using python
20. Word-level Deep Sign Language Recognition from Video using python
21. A network based spam detection framework for reviews in online social media using Python
22. Online Marketplace for freelance services and smart AI Chatbot feature for customer interaction
23. Disaster prediction using AI/ML and building a generic user interaction website and hosting it on Azure cloud
24. Phishing data analysis tool using Python and Machine Learning
25. Detection Cyber bullying using ML and building a static web UI in azure cloud platform
